

Second Nature is Camira's proprietary eco-label designating fabrics which are designed with the environment in mind.

We confirm that this product is **100% Renewable & Compostable:**

- 100% Renewable and Compostable product that bio-degrades naturally within 28 days (BS 6085)
- Made from 100% New Zealand wool, known for its clean, green and unpolluted environment
- Environmentally friendly non-metallic dyestuffs ensure safe compostability with no contamination

All Second Nature fabrics are based on a cradle to cradle concept, benefiting from life-cycle analysis or full carbon footprinting.

Environmental manufacturing applies to all Second Nature fabrics - woven on low energy high speed looms using green electricity, dyed in low liquor dye vessels using less energy, sending less effluent to sewer and using heavy metal free non-contaminating dyestuffs.

This is to certify that

Product.....Sting.....

is 100%.....Renewable & Compostable.....
