
Synergy 170

Environmental Product Profile

95% Virgin Wool, 5% Polyamide

Manufactured from 95% wool, a proven textile fibre with genetically in-built high performance attributes, evolved from nature over thousands of years. It is rapidly renewable and takes the least energy consumption of all the major fibre groups to be converted into usable textile fibre.

EU Eco Label Certified

The EU Ecolabel helps you identify products and services that have a reduced environmental impact throughout their life cycle, from the extraction of raw material through to production, use and disposal. Recognised throughout Europe, the EU Ecolabel is a voluntary label promoting environmental excellence which can be trusted.

Just a Drop

Synergy 170 supports a new CSR programme we call Wool for Water. As water is a core utility for wool textile manufacturing, we've aligned with international water aid charity, Just a Drop, to help deliver accessible, clean and safe water where it is needed most.

For every metre of Synergy we sell, we make a donation to Just a Drop, in support of a water project in Kenya.

LEED Credit Contributor

Synergy 170 can contribute to the following LEED credits:

LEED v3

- MRc2.2 Sustainable purchasing - furniture (over 50% rapidly renewable material)
- MRc5 Regional Materials (depending on distance of project location)
- MRc6 Rapidly Renewable Materials (95% wool)

Information on contribution to other green building schemes is available

Manufacturing

Manufacturing Location – Huddersfield, United Kingdom

Facility systems – ISO 14001, ISO 9001, OHSAS 18001

0% waste to landfill
