

# REACH

Statement on REACH regulation.

Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) is a European Union regulation addressing the safe use of chemicals to protect both human health and the environment.

Under REACH definitions, textile products manufactured by Camira Fabrics Ltd are defined as “articles” without any release of substances and do not require registration according to REACH regulation (EC) No.1907/2006.

Under our obligations as a user of chemicals, we have prepared for the REACH regulation during the manufacture of our products. As such, Camira are committed to the following:.

- Continually reviewing and monitoring our chemical usage
- Maintaining a close dialogue with all suppliers and receiving confirmation that they fulfil their regulatory obligations under the REACH regulation
- Ensuring that our fabrics do not contain substances of very high concern (SVHC)
