Special finishes

Please note that the stated technical performance of a fabric may be affected by the post treatment applied. The technical parameters outlined in our internal specifications provide a guide to fabric performance and is tested by Camira without a post treatment. We therefore recommend that customers conduct their own testing on the final finished components, including but not limited to flammability performance, in the intended format for end installation.

There is a 5 yards minimum order quantity per colorway and a potential working gain or loss of 10% in finished length unless otherwise indicated. Please allow 10 working days for the above treatments. We are unable to accept cancellation for orders where a post treatment has been requested. With the addition of any post treatment or backing the technical performance, the shade of the product may be altered. Please contact our customer services department for further information.
